Please retain for future reference

These instructions should be read carefully and left with the user of the product for future reference

## **BEFORE USE**

Inspect the product for any signs of damage. If the product is damaged, DO NOT use it, and contact your supplier immediately.

Keep away from children.

- Only use on a firm stable surface in an upright position.
- Put the product in position before filling
- Always replace the black cap after filling.
- Do not allow animals or children to knock into or push the product over.
- Do not allow animals or children to drink the water from the tube.
- Change the water every week.
- This unit is for indoor use only.
- The small fish are choking hazards. Keep away from Small Children
- After filling check the product is not leaking.
- This product is not suitable for real fish.
- Do not attempt to transport or move the tube whilst filled.

## **Using the Tube**

- 1) Before connecting the power supply to the unit place the product on a firm flat stable surface and away from obstructions.
- 2) Carefully fill the tube with clean water. Do not exceed the maximum level as indicated on the tube. Check the unit is not leaking before proceeding further.
- 3) Add the artificial fish if required.
- 4) Replace the tube cap and connect the power supply into the socket on the base.
- 5) Move the power switch on the base of the unit to the on position.
- 6) Using the remote control select the on button followed by the required colour. There are 16 selectable colours plus 4 programmes allowing for colour flash/strobe/fade/smooth fade. The controller also features a dimming function.
- 7) Airflow is controllable by an adjustment knob found on the base of the unit.
